Key: *L = Critical Low *H = Critical High # = Delta Value

Test	Result	Flag	Reference	Site
<i>SARS COV 2, RT PCR</i>				
SARS COV 2, RT PCR	NOT DETECTED		NOT DETECT	
	<i>SARS-CoV-2 RNA Not Detected</i>			
	<i>This test has been approved for use under an Emergency Use Authorization Only.</i>			
	<i>The SARS-CoV-2 RNA is generally detectable in respiratory samples during the acute phase of infection. Positive results are indicative of the presence of SARS-CoV-2 RNA; clinical correlation with patient history and other diagnostic information is necessary to determine patient infection status. Positive results do not rule out bacterial infection or co-infection with other viruses.</i>			
	<i>Limitations:</i>			
	<i>False negative results may occur if a specimen is improperly collected, transported or handled. False negative results may also occur if amplification inhibitors are present in the specimen or if inadequate levels of viruses are present in the specimen.</i>
